Education

Master of Science in Computer Science **Expected Dec 2023**
Purdue University *West Lafayette, IN, USA*
- GPA : 4.0 / 4.0

Integrated Master of Technology in Computer Science and Engineering **Jul 2021**
International Institute of Information Technology Bangalore *Bangalore, India*
- 5 year Bachelor's + Master's program, GPA : 3.92 / 4.0

Experience

Purdue University **Aug 2022 - May 2023**
Graduate Teaching Assistant *West Lafayette, IN, USA*
- CS 352 Compilers: Principles and Practice. Spring 2023. Held weekly lab sessions, graded exams.
- MA 165 Calculus I. Fall 2022. Held weekly recitation classes for over 100 students.

American Express **Aug 2021 - Dec 2021**
Software Engineer, Enterprise Architecture Team *Bangalore, India*
- Integrated machine learning capabilities to internal logging, monitoring, and observability framework to detect anomalous behavior.
- Implemented a pipeline to perform automated log analysis on real-time log data collected from various internal systems using Logstash, Elastic Search, and Kibana.

Siemens Healthineers **Jan 2021 - Jul 2021**
Technical Intern, Center for Innovation in Diagnostics Team *Bangalore, India*
- Designed a pipeline to predict Sepsis onset in ICU patients using deep learning, specifically LSTMs on data collected from bedside measurements.
- Model performance exceeded 87% on accuracy, F1-score, specificity, and sensitivity metrics.
- This work is in submission at relevant journals.

Technical Skills

Programming Languages : Python · C++ · C · Java
Tools : Git · GitHub · SQL · Linux · Shell scripting · Docker · Jenkins · Conda · Make
Data Science and ML : Pytorch · Tensorflow · Scikit-Learn · Pandas · Numpy · Jupyter Notebook

Selected Academic Projects

A Bargaining Agent for E-Commerce
- Designed an E-Commerce Agent that has the ability to bargain with a user by offering discounts, recommending product bundles, and evaluating counter-offers made by the user.
- Featured in a `technology.org` article.
- Work published at the Intelligent Virtual Agents conference IVA'20. doi: `10.1145/3383652.3423865`

Openset Recognition Methods for Microscopic Urinalysis
- Worked on openset recognition methods that classify in-class samples and reject out-of-class samples.
- Created an approach that increased rejection accuracy by 10% while maintaining 85% classification accuracy.
- Work published at the Medical Imaging meets NeurIPS 2019 workshop, 33rd Conference on NeurIPS. `[pdf]`

Compiler for a variant of C
- 6 projects culminating in a fully functional compiler for a variant of the C language.
- Built using C++ and the LLVM framework.
- Included syntax and semantic analysis, intermediate code generation, and register allocation.

Relevant Coursework

Core CS : Algorithms · Operating Systems · Compilers · Database Systems · Software Engineering
AI & ML : Machine Learning · Deep Learning · Reinforcement Learning · Computer Vision
Math : Probability Theory · Discrete Mathematics · Calculus · Linear Algebra · Convex Optimization
